

Subrogation Management

In depth claim investigations and subrogation support to keep loss expenses low and the life cycle of the claim as short as possible.

We help our Property & Casualty clients by delivering an end-to-end subrogation solution allowing our clients to focus on getting the customer back into pre-loss condition while maintaining control of expenses and outcome of the claim, throughout life of the claim.

Many organizations do not have the capacity, knowledge, or tools to properly subrogate their claims and as your trusted partner, we will provide support until claim funds are recovered. Engaging at the FNOL level is important as subrogation is often won or lost within the first 48 hours of a claim. We handle notifying responsible parties of your intent to subrogate, engage with industry experts for origin and cause investigations as well as negotiate settlement. In the event legal support is needed, we have relationships with attorneys across the US. Each step of the claim recovery process is managed closely and communicated with transparency.

Why Davies?

Here's what makes us different:

- ✓ **Engaged Partner** - Our clients retain ownership of the claim and with our guidance, make decisions throughout the subrogation lifecycle based on their business objectives. We provide monthly reporting, conduct quarterly touch base meetings, and operate with an open-door policy.
- ✓ **Industry Experience** - Our team members have 20+ years of property and casualty experience and understand how to connect the dots for a timely and cost-effective recovery.
- ✓ **Broad Capability** - We have a vast network of industry experts and no claim is too small for us to recover.
- ✓ **Success Driven** - Your success is our success. Therefore, if there is no recovery, there is no cost to our clients for our services. And if there is a recovery, as the amount of the claim increases, our fee decreases.
