

# Subrogation Management

We meet the needs of our clients by conducting in depth analysis, quality claim investigations, and efficient recovery of claim funds.

**Subrogation is an important part of an effective cost containment strategy.** To keep premiums low, it is vital to recover claim funds when someone else is responsible. Whether you are a self-funded entity, TPA, MGU, or stop-loss carrier subrogation matters.

## Why Davies?

Here's what makes us different:

- ✓ **Engaged Partner** - It is important to us that our client receives effective and transparent communication throughout the life cycle of the recovery.
- ✓ **Industry Experience** - Our team has 20+ years of experience and works with self-insureds, TPAs, MGUs, and stop-loss carriers.
- ✓ **Broad Capability** - We handle claim recovery across the U.S. as well as Bermuda, the Cayman Islands, and the Bahamas.
- ✓ **Success Driven** - Your success is our success. Therefore, if there is no recovery, there is no cost to our clients for our services.
- ✓ **Claim Expertise** - We work with companies big and small to connect the dots to recovery without the need for legal expense.
